

Registered Nurses' Association of Ontario
Promoting 2SLGBTQI+ Health Equity
June 2021

Systematic Review Search Strategy

Seven systematic reviews of recent literature relevant to the scope of the Best Practice Guideline (BPG) were conducted by a health sciences librarian.

In addition, panel members were asked to review personal libraries to identify key articles not found through the search strategies. Articles identified by panel members were included in the search results if two guideline development methodologists independently determined the articles had not been identified by the literature search and met the inclusion criteria.

Databases Searched: Cochrane Central Register of Controlled Trials (CCRCT), Cochrane Database of Systematic Reviews, Cumulative Index to Nursing and Allied Health (CINAHL), EMBASE, Emcare Nursing, ERIC, LGBT Life (Original search only), MEDLINE, MEDLINE Ahead of Print and In Process, PsychINFO.

Inclusion Criteria:

The following criteria were used to guide the literature search:

- A primary focus on the following interventions for health service organizations, academic institutions, schools, health providers and/or students, and the prioritized outcomes per topic:
 1. **Intervention** – Communication strategies to promote inclusivity within health-service organizations
Outcomes – Person's comfort and person's safety
 2. **Intervention** – the creation of safer spaces in health-service organizations and school settings
Outcomes – Person's experience, person's safety, returns of persons, diverse representation of persons and health providers
 3. **Intervention** – the promotion of risk screening by health providers to improve care for 2SLGBTQI+ people
Outcome – Number of persons accessing screening, level of treatment and support
 4. **Intervention** – Clinical group-based interventions for health conditions
Outcome – Mental health, social support, and self-management

5. **Intervention** – Group-based interventions to improve care for 2SLGBTQI+ people?

Outcome – Person's experience, social support, and self-management

6. **Intervention** – education on 2SLGBTQI+ health for students entering health professions

Outcome – Student experience, student knowledge, and student skills

7. **Intervention** – continuing education for health providers to improve care for 2SLGBTQI+ people

Outcome – Health provider knowledge, attitude, comfort and/or confidence

8. **Intervention**- 2SLGBTQI+ specific (safe) spaces in long-term care settings

Outcome- knowledge of staff, 2SLGBTQI+ persons' responsive behaviours, perceived safety, experience, and incidence of peer bullying

N.B. Questions 4 and 5 and 6 and 7 were searched together

- Published between January 2012 and November 2020
- Published in English
- Accessible for retrieval
- Conducted in any geographic region
- Applicable to all health service organizations and academic institutions and schools
- Applicable to all health providers and students
- Peer-reviewed literature
- Study methodology limited to any study design (quantitative, qualitative, mixed methods, systematic reviews)

Exclusion Criteria:

The following criteria were used to exclude literature from the search:

- Topic **NOT** related to the aforementioned interventions prioritized outcomes
- Dissertations, commentaries, narratives, discussion papers, case studies, expert reports, consensus documents, studies with a specific methodology
- Studies not published in English
- Unpublished (grey literature)
- Studies published prior to 2012

Search Terms:

Question 1: What communication strategies should be recommended to improve care for 2SLGBTQI+ people?

Original Search Strategy: (January 2012 to August 2018)

Update Search: November 2018– September 2020

**Note: the same original search strategy was used to complete the update searches.*

Question 2: Should the creation of safe spaces in health-service organizations* be recommended to improve care for 2SLGBTQI+ people?

***Note:** This recommendation question also included literature within school settings. Public health nurses can practice within the school setting. There was a dearth of research within traditional health settings, therefore the inclusion criteria were expanded to include school settings. A separate search was conducted for schools and is included below.

Original Search Strategy: (January 2012 to August 2018)

Update Search: November 2018– September 2020

**Note: the same original search strategy was used to complete the update searches.*
