

Registered Nurses' Association of Ontario
Transitions in Care and Services, Second Edition
June 2023

Systematic Review Search Strategy

Two systematic reviews of recent literature relevant to the scope of the Best Practice Guideline (BPG) were conducted by a health sciences librarian.

In addition, expert panel members were asked to review personal libraries to identify key articles not found through the above search strategies. Articles identified by panel members were included in the search results if two guideline development methodologists independently determined the articles had not been identified by the literature search and met the inclusion criteria.

Databases Searched: MEDLINE, MEDLINE Epub Ahead of Print and In-Process, Embase, Emcare Nursing, Cochrane Central Register of Controlled Trials, Cochrane Database of Systematic Reviews, APA PsychInfo, Cumulative Index to Nursing and Allied Health (CINAHL)

Inclusion Criteria:

The following criteria were used to guide the literature search:

- A primary focus on the following interventions for health and social service organizations, academic institutions, health and social service providers and/or students, and the prioritized outcomes per topic:
 - Recommendation Question #1:
 - **Intervention** – Support from a system navigator
 - **Outcomes** – Patient quality of life, emergency department visits (within 30 days of a transition in care), follow-up visit with a health or social service provider, patient satisfaction and readmission rates (within 30 days of a transition in care)
 - Recommendation Question # 2:
 - **Intervention** – A formal interprofessional cross-sectoral approach
 - **Outcomes** – Follow-up visit with a health or social service provider, emergency department visits (within 30 days of a transition in care), patient quality of life, patient satisfaction, readmission rates (within 30 days of a transition in care)
- A focus on transitions in care, including transitions:
 - Within organizations (e.g. from one hospital unit to another hospital unit)
 - Between/across organizations or sectors (e.g. from hospital to home, home to hospice, etc.)
- A focus adult or pediatric persons experiencing a transition in care
- Applicable to all health or social service organizations and health and social service providers
- Published after January 2016
- Published in English
- Accessible for retrieval
- Conducted in any geographic region
- Peer-reviewed literature
- Any study design (e.g., quantitative, qualitative, mixed methods, systematic reviews)

Exclusion Criteria:

The following criteria were used to exclude literature from the search:

- Topic **NOT** related to the aforementioned interventions or prioritized outcomes
- Dissertations, commentaries, narratives, discussion papers, case studies, expert reports, consensus documents, studies with no specific methodology
- Studies not published in English
- Unpublished literature (e.g., grey literature)
- Studies published prior to 2016

Search Terms:

Recommendation Question #1: Should support from a system navigator be recommended or not to improve outcomes for persons encountering a transition in care?

Original Search Strategy:

Dates searched: January 2016 – June 2021

Databases searched:

- MEDLINE
- MEDLINE Epub Ahead of Print and In-Process
- Embase
- Emcare Nursing
- Cochrane Central Register of Controlled Trials
- Cochrane Database of Systematic Reviews
- APA PsychInfo
- Cumulative Index to Nursing and Allied Health (CINAHL)

Update Search for Recommendation Question #1: Should support from a system navigator be recommended or not to improve outcomes for persons encountering a transition in care?

Dates searched: June 2021 – January 2023

Databases searched: CINAHL and MEDLINE

**Notes: The same original search strategy was used to complete the update search but the search was only applied to CINAHL and MEDLINE for feasibility purposes.*

The librarian also found that a new subject heading had been created that was not available at the time the original search was conducted in 2021. This subject heading and the associated textword string was added to the search strategy for the update search.

- *Newly added subject heading: MeSH term Hospital to Home Transition/*
- *Associated textword string: ("hospital to home" or "hospital to homes" or "H2H transition*")*

Database: Medline
Search strategy:

Update Search for Recommendation Question #2: Should a formal interprofessional cross-sectoral approach be recommended or not to support persons encountering a transition in care?

Dates searched: June 2021 – January 2023

Databases searched: CINAHL and MEDLINE

**Notes: The same original search strategy was used to complete the update search but the search was only applied to CINAHL and MEDLINE for feasibility purposes.*

The librarian also found that a new subject heading had been created that was not available at the time the original search was conducted in 2021. This subject heading and the associated textword string was added to the search strategy for the update search.

- *Newly added subject heading: MeSH term Hospital to Home Transition/*
- *Associated textword string: ("hospital to home" or "hospital to homes" or "H2H transition*")*

Database: Medline
