

## What is ECCO?

Enhancing Community Care for Ontarians (ECCO) calls on government and health system partners to strengthen community care and anchor the health system in primary care to better meet the health needs of all Ontarians. First released in 2012 and next in 2014, ECCO 3.0 aligns with much needed health system transformation that responds to the COVID-19 pandemic.

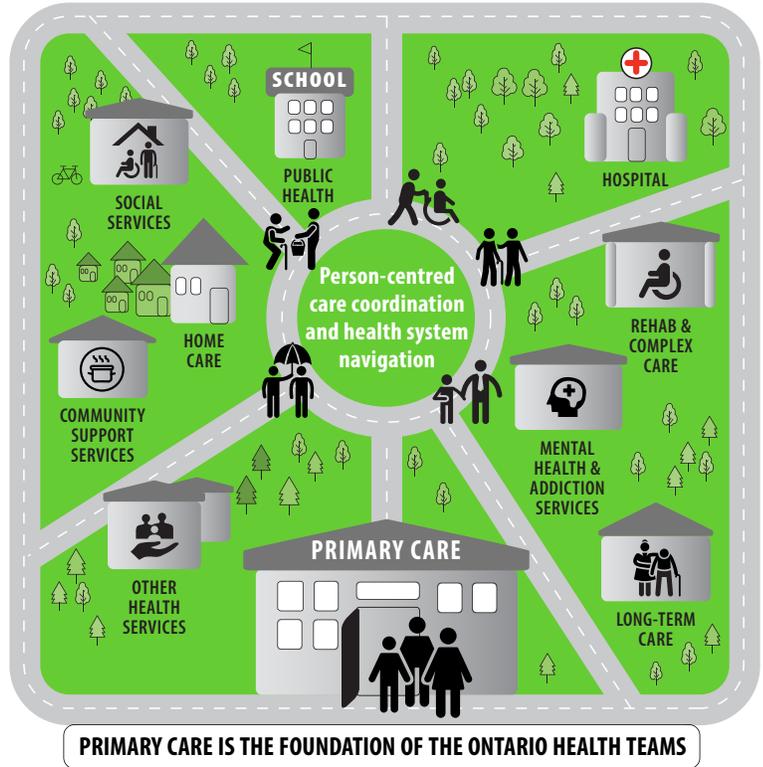

ECCO 1.0  
2012

ECCO 2.0  
2014

ECCO 3.0  
2020

ECCO Model 3.0

## Why now?

The COVID-19 pandemic exposed the flaws in the system with:

- Overreliance on the hospital sector
- Underutilization of primary care and home health care
- Lack of early attention to vulnerable populations and devastating effects, in particular, on residents of nursing and retirement homes
- Slow response

Time to reflect and act ahead of the second wave of COVID-19

*For integrated systems of care*

We can and must do better by accelerating the provincial health system transformation plans, and expanding on the strengths and potential of the Ontario Health Teams (OHT)

## What attributes do we envision for our health system through an ECCO lens?

Accessible

Equitable

Person-centred

Integrated

Publicly-funded

## What will adopting the ECCO model mean for our health system?

Universal reach

Comprehensive care coordination

Evidence-based practice

Upstream approach to care

Enhanced community care across the continuum

Full scope of practice

Inter-professional primary care teams

Long-term care as *home*

Optimized digital health

## How do we get there from here?

Lead with primary care

Expand OHTs to incorporate long-term care

Embrace Ontario Health as single system planner

Integrate & streamline public health

Align funding with Quadruple Aim

It's time to strengthen community care & anchor our health system in primary care.
